

MuleSoft Course & Exam Catalog

Prices as of March 20th, 2018

Training delivery methods

Instructor-led training is available in three formats:

- **Public online** classes are scheduled regularly in several time zones.
- **Public classroom** classes are offered regularly in a few cities at this time for our more popular subjects.
- **Private** classes for customers and partners are available anywhere worldwide.

Self-study training is available in our **MuleSoft.U** line of courses. These are free, self-paced courses that are peer supported.

Training terms and conditions

For all terms and conditions, see https://training.mulesoft.com/legal/training_terms_and_conditions.

Instructor-led courses

Course	Description	Format	Price (FTC)
Getting Started with Anypoint Platform	This introductory instructor-led course is for anyone and everyone involved in an Anypoint Platform project who wants to get hands-on experience learning what Anypoint Platform is and how it is used to discover, consume, design, build, deploy, manage, and govern APIs. Students do not write any code. This course is not for developers and architects who are going to take the <i>Anypoint Platform Development: Fundamentals</i> course or the self-study <i>MuleSoft.U Development Fundamentals</i> course, which include this content and much more.	1 day private onsite (up to 12 students)	24

Course	Description	Format	Price (FTC)
Anypoint Platform: Flow Design	This instructor-led course is for people that work with data and want to get hands-on experience using the new web-based flow designer in Design Center to build integrations that connect systems quickly and easily.	1 day public online (per seat)	3
		1 day public classroom (per seat)	3
		1 day private onsite (up to 12 students)	24
Anypoint Platform: API Design	This instructor-led course is for API designers, developers, and architects who want to get hands-on experience creating well-designed, modular API definitions using RAML 1.0 and Anypoint Platform.	2 day public online (per seat)	6
		2 day public classroom (per seat)	6
		2 day private onsite (up to 12 students)	48
Anypoint Platform Development: Fundamentals	This instructor-led course is for developers and architects who want to get hands-on experience using Anypoint Platform to build APIs and integrations. In the first part, students use Anypoint Platform discover, consume, design, build, deploy, manage, and govern APIs. In the second part, students focus on using Mule and Anypoint Studio to build applications for use as API implementations and/or integrations. The course includes a voucher code to take the <i>MuleSoft Certified Developer – Integration and API Associate</i> exam.	5 day public online (per seat)	15
		5 day public classroom (per seat)	15
		5 day private onsite (up to 12 students)	120
Anypoint Platform Development: Mule 4 for Mule 3 Users	This instructor-led course is for experienced Mule 3 developers who want to quickly uplevel their skills to Mule 4. The course is hands-on and focuses on what's new and/or different in Mule 4 and Studio 7. The course includes a voucher to take a new <i>MuleSoft Certified Developer</i> exam for Mule 4 to be released in 2018.	2 day public online (per seat)	6
		2 day public classroom (per seat)	6
		2 day private onsite (up to 12 students)	48
Anypoint Platform Development: Advanced	This instructor-led course is for developers and architects interested in advancing their application development skills beyond those taught in the <i>Anypoint Platform Development - Fundamentals</i> course or the self-paced <i>MuleSoft.U Development Fundamentals</i> course.	4 day public online (per seat)	9
		3 day public classroom (per seat)	9
		3 day private onsite (up to 12 students)	72

Course	Description	Format	Price (FTC)
Anypoint Platform Development: DataWeave	This instructor-led course is for developers interested in advancing their DataWeave skills beyond those taught in the <i>Anypoint Platform Development - Fundamentals</i> course or the self-study <i>MuleSoft.U Development Fundamentals</i> course.	1 day public online (per seat)	3
		1 day public classroom (per seat)	3
		1 day private onsite (up to 12 students)	24
Anypoint Platform Architecture: Application Networks	This instructor-led course teaches experienced enterprise and solution architects how to direct the emergence of an effective application network out of individual integration solutions following API-led connectivity across an organization. It is case-study driven, with the solution architecture and effect on the organization's enterprise architecture for two strategic change initiatives being documented as the course progresses. It includes a voucher code to take a new MuleSoft Certified Architect exam to be released in 2018.	2 day public online (per seat)	7
		2 day public classroom (per seat)	7
		2 day private onsite (up to 12 students)	52
Anypoint Platform Architecture: Solution Design	This instructor-led course teaches experienced solution and technical architects or lead/senior developers to design enterprise integration solutions for the Mule runtime. It builds on prior experience developing and deploying Mule applications, and focuses on providing the knowledge to make architecture and design decisions about solutions instead of on implementation details. It includes a voucher code to take the <i>MuleSoft Certified Architect – Solution Design Specialist</i> exam. Note: This is not a development course; students will not be using Anypoint Studio or writing any code.	5 day public online (per seat)	14
		4 day public classroom (per seat)	14
		4 day private onsite (up to 12 students)	104
Anypoint Platform Operations: CloudHub	This instructor-led course is for all operations and administration personnel, developers, and architects who want to get hands-on experience managing and monitoring Mule applications deployed to CloudHub	2 day public online (per seat)	3
		1 day public classroom (per seat)	3
		1 day private onsite (up to 12 students)	24
Anypoint Platform Operations: Customer-Hosted Runtimes	This instructor-led course is for all operations and administration personnel, developers, and architects who want to get hands-on experience managing and monitoring customer-hosted Mule runtimes and applications (on-prem or in a private cloud) with Anypoint Runtime Manager (whether Runtime Manager is MuleSoft-hosted in the cloud or customer-hosted using Anypoint Platform Private Cloud Edition).	2 day public online (per seat)	6
		2 day public classroom (per seat)	6
		2 day private onsite (up to 12 students)	48

Course	Description	Format	Price (FTC)
Anypoint Platform Operations: API Management	This instructor-led course is for all operations and administration personnel, developers, and architects who want to get hands-on experience managing and deploying APIs on Anypoint Platform (whether Anypoint Platform is MuleSoft-hosted in the cloud or customer-hosted using Anypoint Platform Private Cloud Edition).	1 day public online (per seat)	3
		1 day public classroom (per seat)	3
		1 day private onsite (up to 12 students)	24

Self-study courses

Course	Description	Price (FTC)
MuleSoft.U Getting Started with Anypoint Platform	This self-study course is for anyone and everyone involved in an Anypoint Platform project who wants to get hands-on experience learning what Anypoint Platform is and how it is used to discover, consume, design, build, deploy, manage, and govern APIs. Students do not write any code. This course is not for developers and architects who are going to take the <i>Anypoint Platform Development: Fundamentals</i> course or the self-study <i>MuleSoft.U Development Fundamentals</i> course, which include this content and much more.	0
MuleSoft.U Flow Design	This self-study course is for people that work with data and want to get hands-on experience using the new web-based flow designer in Design Center to build integrations that connect systems quickly and easily.	0

In the first part, students use Anypoint Platform discover, consume, design, build, deploy, manage, and govern APIs. In the second part, students focus on using Mule and Anypoint Studio to build applications for use as API implementations and/or integrations.	0

Certification exams

Course	Description	Format	Price (FTC)
MCD – Integration and API Associate	The <i>MCD – Integration and API Associate</i> exam validates that a candidate understands and can apply and build upon the core concepts needed to work on MuleSoft projects with guidance and supervision. A voucher for the exam is included with the instructor-led <i>Anypoint Platform Development: Fundamentals</i> course.	Proctored, closed book, online or at a testing center	1

Course	Description	Format	Price (FTC)
MCD - API Design Associate	The <i>MCD - API Design Associate</i> understands the core concepts of the RESTful API Modeling Language (RAML) and is proficient in designing RESTful APIs with MuleSoft solutions. The exam is included with the instructor-led <i>Anypoint Platform Development: API Design</i> course.	Unproctored, open book, online	0.5
MCD - Integration Professional	The <i>MCD - Integration Professional</i> is proficient with real-world MuleSoft development and can develop complex projects on his/her own. Completion of the <i>Anypoint Platform Development: Advanced</i> course and/or studying documentation is not sufficient preparation for this exam; it also requires extensive development experience. Individuals with multiple months or years of MuleSoft project experience are encouraged to register.	Proctored, closed book, online or at a testing center	1
